What This Means

Summary Security-Widefield's drinking water has received a D grade, meaning residents are being served water with PFAS chemical levels that exceed federal safety limits. The Widefield Water and Sanitation District's water tests show PFOS at 9. 9 parts per trillion, 2.

What You Can Do

- Request your utility's full Consumer Confidence Report (CCR) for additional water quality data
- Consider an NSF 53 (pitcher) or NSF 58 (reverse osmosis) certified filter if PFAS were detected
- Attend your local water board or city council meeting to ask about treatment plans
