

## Rockford, Michigan

Report generated May 25, 2026 | EPA UCMR 5 testing data (2023-2025)

Population served	<b>53,015</b>
Water systems tested	<b>3</b>
Compounds detected	<b>87</b>
Above federal limits	<b>0</b>

### Summary

## Summary Rockford's drinking water has received an overall grade of B, meaning residents are served by water systems that are being monitored for PFAS contamination but show no confirmed exceedances of federal limits based on available data. Three water systems serve the area, Plainfield Township, the City of Rockford, and Lake Bella Vista, and none reported specific concentration levels, making it difficult to assess exact risk, though no system was flagged for violating EPA standards. Dozens of individual PFAS compounds were detected across all three systems, a finding consistent with the area's history of industrial contamination.

### Systems Included in This Report

- B | PLAINFIELD TOWNSHIP (42,271 served)
- A | ROCKFORD, MI (7,160 served)
- B | LAKE BELLA VISTA (3,584 served)

## PLAINFIELD TOWNSHIP

GRAND RAPIDS, MI | PWSID: MI0005370 | Population served: 42,271  
Based on EPA UCMR 5 testing data (2023-2025) | Report generated May 25, 2026

### PFAS detected below federal limits

The EPA set enforceable limits for six PFAS compounds in April 2024. Grade reflects the worst single compound result.

### Findings

Compound	Detected (ppt)	EPA Limit (ppt)	Ratio	Status
PFBA	5.1	-	-	No federal limit
PFBS	4.6	-	-	No federal limit

### What This Means

This water system serves 42,271 residents in GRAND RAPIDS. EPA testing detected 29 PFAS compounds, 0 of which exceed federal drinking water limits. Residents served by this system should consider installing an NSF 53 or NSF 58 certified water filter.

### What You Can Do

- Request your utility's full Consumer Confidence Report (CCR) for additional water quality data
- Consider an NSF 53 (pitcher) or NSF 58 (reverse osmosis) certified filter if PFAS were detected
- Attend your local water board or city council meeting to ask about treatment plans

## ROCKFORD, MI

ROCKFORD, MI | PWSID: MI0005730 | Population served: 7,160  
Based on EPA UCMR 5 testing data (2023-2025) | Report generated May 25, 2026

### No PFAS compounds detected above reporting limits

The EPA set enforceable limits for six PFAS compounds in April 2024. Grade reflects the worst single compound result.

### Findings

Compound	Detected (ppt)	EPA Limit (ppt)	Ratio	Status
No PFAS compounds were detected in EPA testing of this water system.				

### What This Means

No PFAS compounds were detected in this system's testing. This does not guarantee the absence of PFAS, as testing covers specific compounds at specific detection limits.

### What You Can Do

- Request your utility's full Consumer Confidence Report (CCR) for additional water quality data
- Consider an NSF 53 (pitcher) or NSF 58 (reverse osmosis) certified filter if PFAS were detected
- Attend your local water board or city council meeting to ask about treatment plans

## LAKE BELLA VISTA

ROCKFORD, MI | PWSID: MI0003695 | Population served: 3,584

Based on EPA UCMR 5 testing data (2023-2025) | Report generated May 25, 2026

### PFAS detected below federal limits

The EPA set enforceable limits for six PFAS compounds in April 2024. Grade reflects the worst single compound result.

### Findings

Compound	Detected (ppt)	EPA Limit (ppt)	Ratio	Status
PFBS	3.1	-	-	No federal limit

### What This Means

This water system serves 3,584 residents in ROCKFORD. EPA testing detected 29 PFAS compounds, 0 of which exceed federal drinking water limits. Residents served by this system should consider installing an NSF 53 or NSF 58 certified water filter.

### What You Can Do

- Request your utility's full Consumer Confidence Report (CCR) for additional water quality data
- Consider an NSF 53 (pitcher) or NSF 58 (reverse osmosis) certified filter if PFAS were detected
- Attend your local water board or city council meeting to ask about treatment plans
