What This Means

Summary Security-Widefield's drinking water has received a D grade, meaning residents are being served water with PFAS chemical levels that exceed federal safety limits. The Widefield Water and Sanitation District's water tests show PFOS at 9.9 parts per trillion, 2.

What You Can Do

- Request your utility's full Consumer Confidence Report (CCR) for additional water quality data
- Consider an NSF 53 (pitcher) or NSF 58 (reverse osmosis) certified filter if PFAS were detected
- Attend your local water board or city council meeting to ask about treatment plans
